

Remarks :

Effect of Time : Statistically Significant, $F(2, 32)$
 $= 148.23, p < .001, \eta_p^2 = .90$.

cholesterol levels significantly decreased
over the study period.

Effect of Margarine : Not Significant: $F(1, 16)$
 $= 1.63, p = .220, \eta_p^2 = .09$
There was no overall difference
in cholesterol between brand A
and Brand B.

(Margarine $\times$ Time) : Statistically Significant,
 $F(2, 32) = 3.52, p =$
 $.041, \eta_p^2 = .18$.
